

Subject: Institutional Approval for Education Research Under NEP2020

The NEP Advisory Committee of the Institute of Chemical Technology (ICT), Mumbai, has reviewed the proposal submitted by Ms. Riddhi Bharani (Ph.D. Scholar, Department of Mathematics, Institute of Chemical Technology, Mumbai; Roll No. 20MAT404) and Dr. Amiya Ranjan Bhowmick, Assistant Professor, Department of Mathematics, Institute of Chemical Technology, Mumbai, for conducting an educational research study at ICT Mumbai.

The proposed research, entitled “A study exploring students’ understanding of sampling distributions and the role of simulation-based pedagogy,” is to be conducted among students enrolled in the Multi-Disciplinary Minor Degree in Machine Learning and Artificial Intelligence under NEP 2020 post their Statistical Computing (MAT1501) course. The programme is offered by the Department of Mathematics under the NEP2020.

The Committee has reviewed the proposed research with respect to the participation of students, the nature of the assessment, the proposed use of student responses, and the procedures for obtaining informed consent. The Committee approves the conduct of the proposed educational research at ICT Mumbai, subject to the following conditions:

1. Informed consent shall be obtained from all participating students prior to their participation in the research.
2. For participants below 18 years of age, appropriate parental/legal guardian consent shall be obtained in accordance with institutional requirements.
3. Participation in the research shall be voluntary, and students shall not be disadvantaged academically on account of their decision to participate or not participate in the research.
4. Student responses and related information shall be treated confidentially, and personally identifiable information shall not be disclosed in publications, presentations, or other scholarly outputs arising from the study.
5. The assessment responses shall be used only for the educational research purposes described in the proposal and consent documentation.
6. The researchers shall take appropriate measures to minimize any potential conflict arising from the involvement of the course instructor in both the instructional and assessment processes.
7. Any dissemination of the findings shall be undertaken in a manner that protects the identity and privacy of the participating students.

Based on the proposal and information submitted, the NEP Committee grants institutional approval for the conduct of the above educational research study at the Institute of Chemical Technology, Mumbai, for the specified student cohort and study period.

For the NEP Advisory Committee
